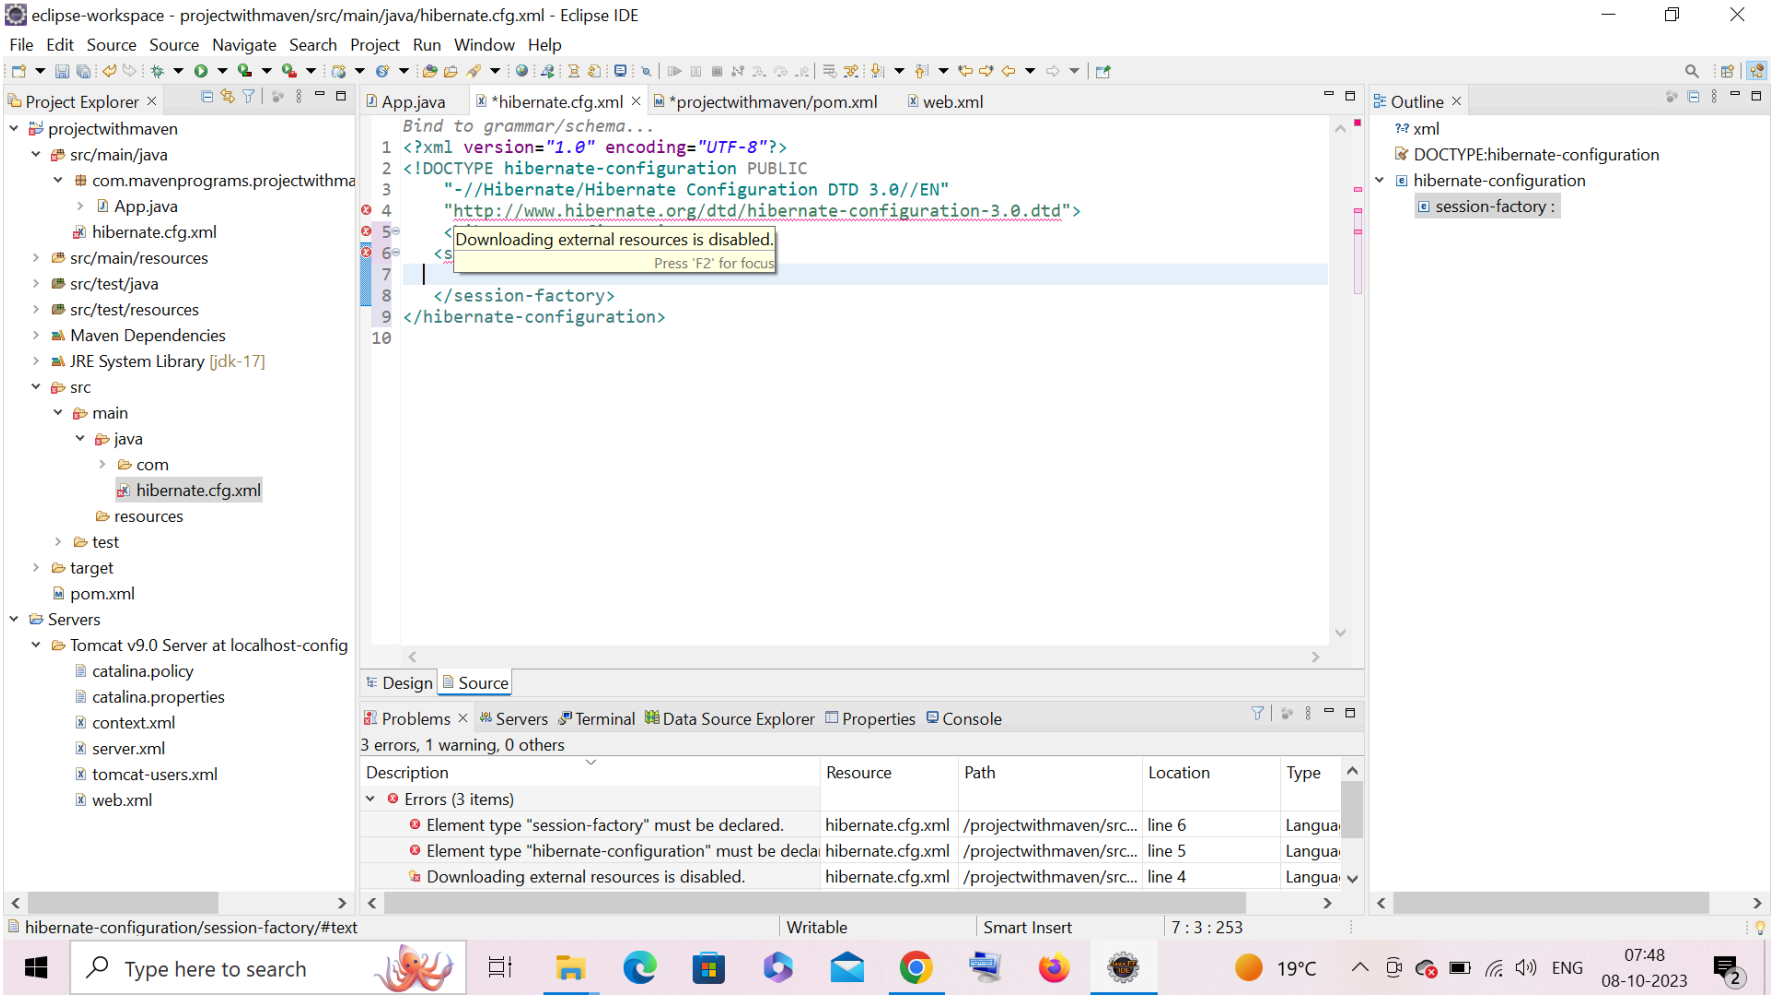
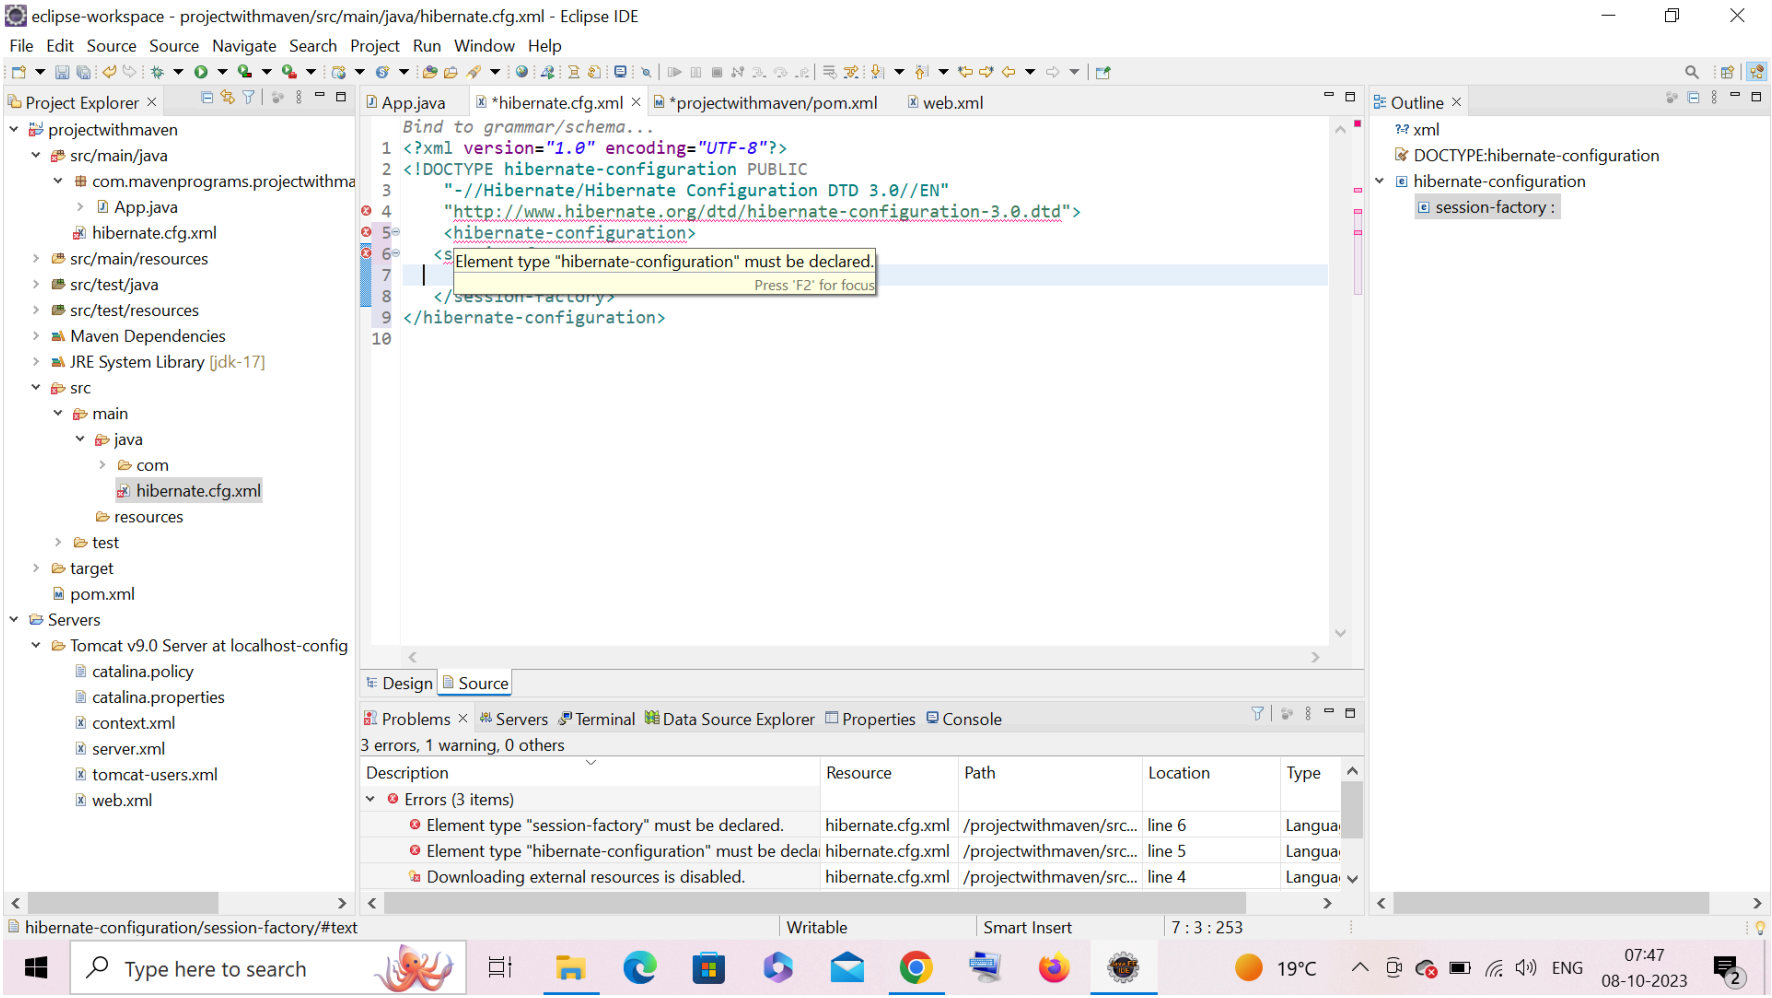
While I am trying to do hibernate configuration I put hibernate dtd in hibernate.cfg.xml file and it is showing an error that downloading from external resources is disabled. Can you please help me with this error?





I wanted to create a maven project with hibernate, so I am trying to do my hibernate configuration to do mapping.

download configuration resources external hibernate.cfg.xml

If you are using Eclipse :

Go to top bar : Window -> Preference -> Maven -> tick the option ('download artifact javadoc').

Thats is 'Apply & Close'.

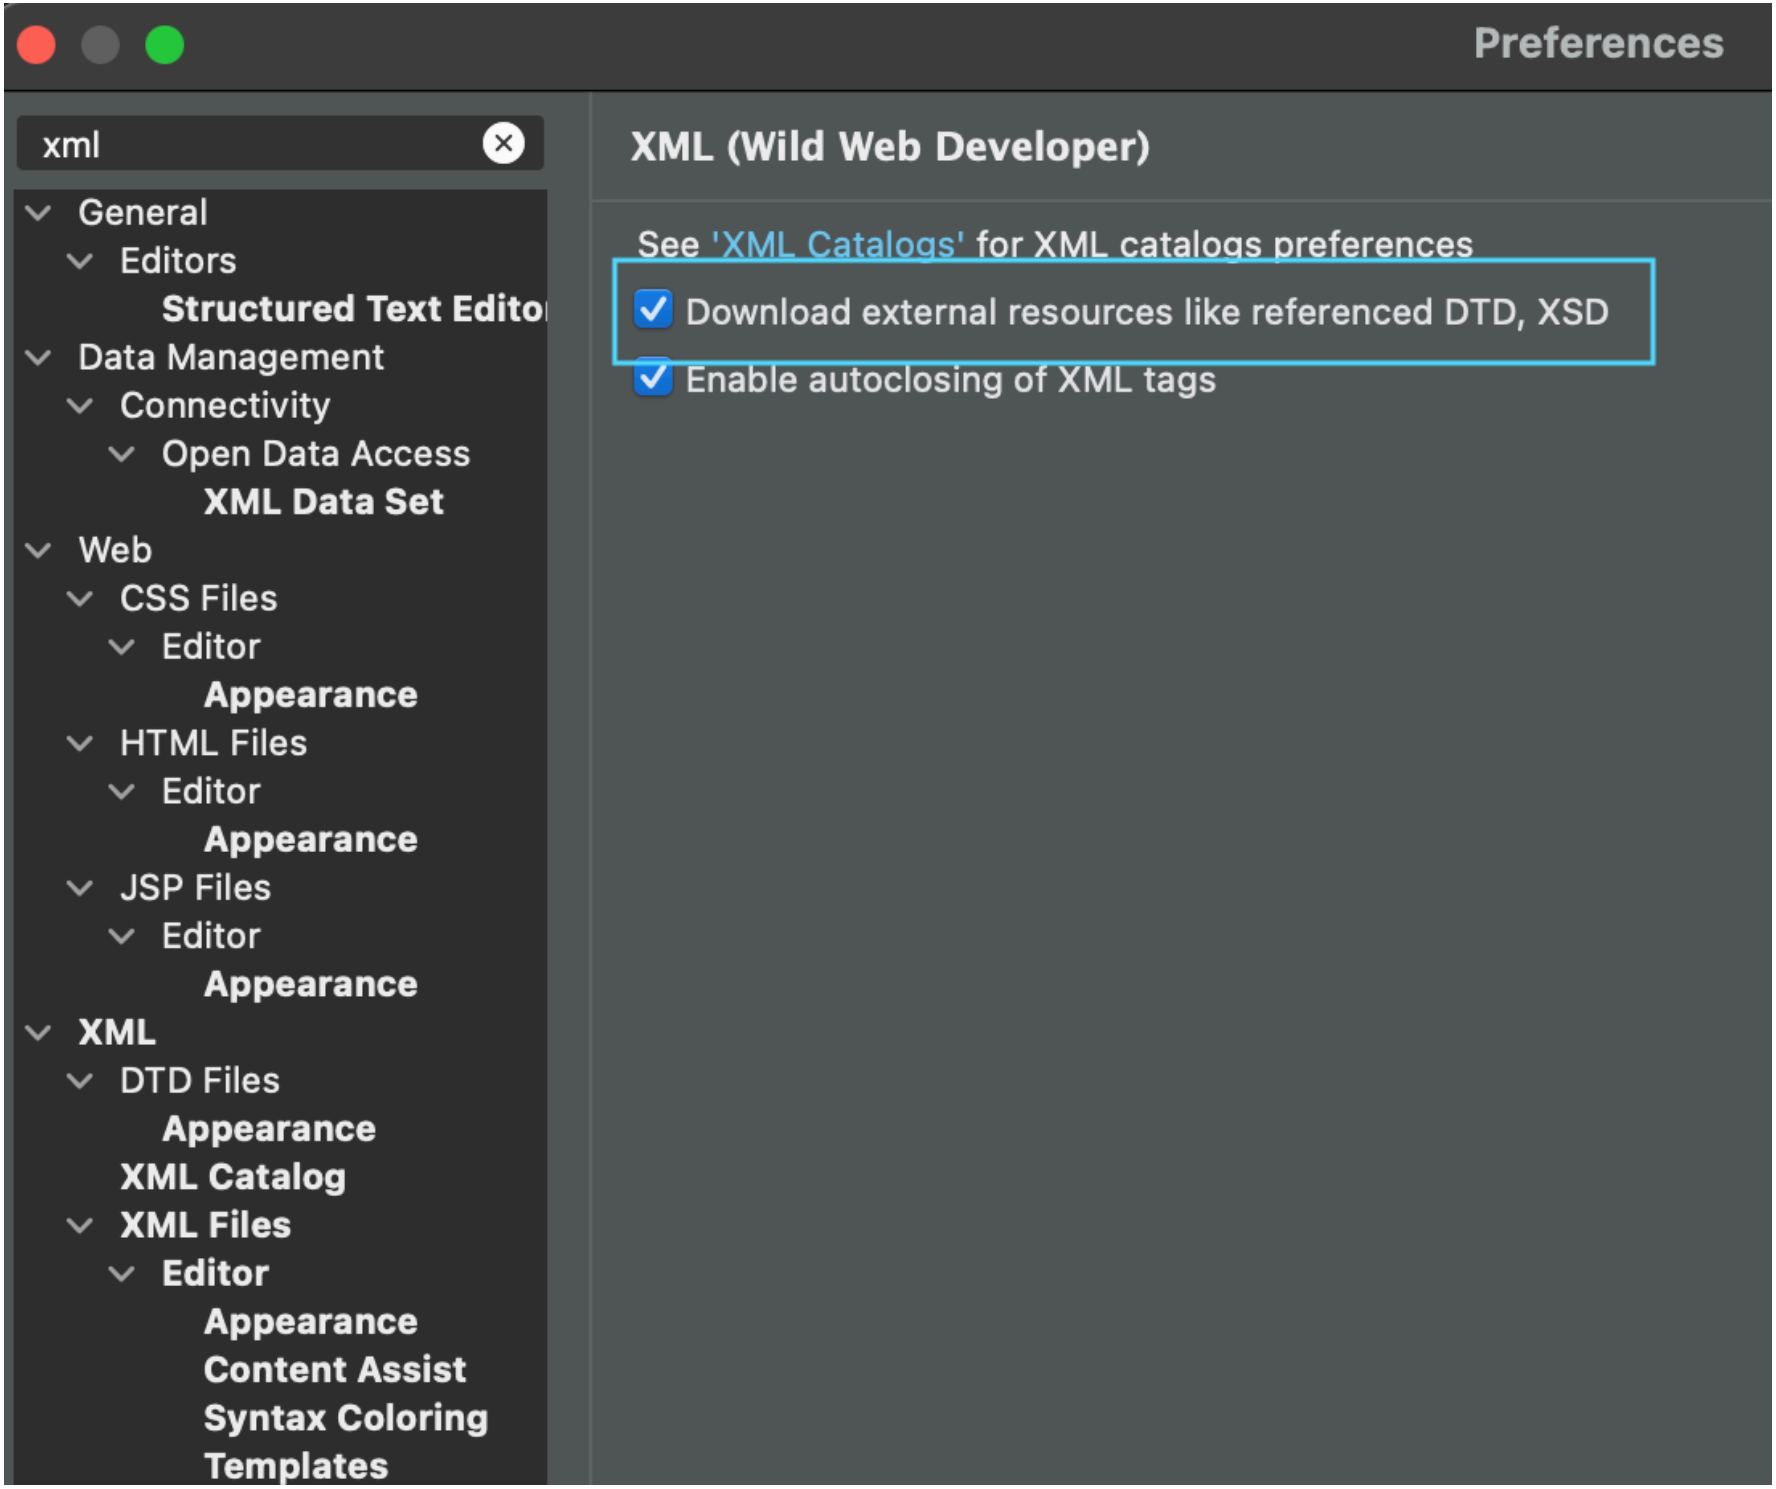
I was able to get this to work the the below option:



Preferences
xml
General
Editors
Structured Text Edito
Data Management
Connectivity
Open Data Access
XML Data Set
Web
CSS Files
Editor
Appearance
HTML Files
Editor
Appearance
JSP Files
Editor
Appearance
XML
DTD Files
Appearance
XML Catalog
XML Files
Editor
Appearance
Content Assist
Syntax Coloring
Templates
XML (Wild Web Developer)
See 'XML Catalogs' for XML catalogs preferences
Download external resources like referenced DTD, XSD
Enable autoclosing of XML tags

If you are encountering the
"Downloading from external resources is disabled in Hibernate DTD" issue while
using Eclipse, follow these steps to resolve it:

1. Navigate to the top bar and select "Window."

2. From the dropdown menu, choose "Preferences."

3. Within the Preferences window, locate and click on "Maven."

4. In the Maven preferences, find the option labeled "Download artifact javadoc."

5. Tick the checkbox next to "Download artifact javadoc" to enable the option.

6. After making the change, click on the "Apply & Close" button to save
your preferences.

By enabling the "Download artifact javadoc" option in Maven preferences,
you should address the issue of downloading from external resources being disabled
in Hibernate DTD within Eclipse.
