

## SpringBoot – Add Forgot Password View

Forgot-password.html – Create a file forgot-password.html file in account\_views

```
<!DOCTYPE html>
<html lang="en" xmlns:th="http://www.thymeleaf.org">

  <head th:replace="/fragments/head :: head">

<body class="sub_page">

  <div class="hero_area">
    <div class="bg-box">
      
    </div>
    <header th:replace="/fragments/header :: header">
  </div>
<!-- book section -->
<section class="book_section layout_padding">
  <div class="container">
    <div class="heading_container">
      <h4>
        Forgot Password
      </h4>
    </div>
    <div class="row">
      <div class="col-md-6">
        <div class="form_container">
          <form action="#"
            th:action="@{/reset-password}"
            method="post">
            <div>
              <input id="email" name="email" type="email" class="form-control"
placeholder="Email" required/>
            </div>
            <div class="btn_box">
              <button type="submit">
                Reset Password
              </button>
            </div>
          </form>
          <hr/>
          <div class="form-check">
            <a th:href="@{/login}" class="link-secondary">Login</a>
          </div>
        </div>
```

```

        </div>
    </div>
</section>
<!-- end book section -->
<footer th:replace="/fragments/footer :: footer">
</body>

</html>

```

Add this in controller -> AccountController.java

```

@GetMapping("/forgot-password")
public String forgot_password(Model model) {
    return "account_views/forgot-password";
}

```

## Output
