Authorize

Auth Controller

Controller for Account management

PUT

`/api/v1/auth/users/{user_id}/update-authorities`

Update authorities

Parameters

Try it out

Name	Description
------	-------------

user_id * required

integer(\$int64)

(path)

user_id

Request body required

application/json

Example Value Schema

```
{
  "authorities": "USER"
}
```

Responses

Code	Description	Links
------	-------------	-------

200	Update authorities	No links
-----	--------------------	----------

Media type

application/json

Controls Accept header.

Example Value Schema

```
{
  "id": 0,
  "email": "string",
  "authorities": "string"
}
```

Code	Description	Links
400	<div>Invalid user ID</div> <div>Media type</div> <div>application/json</div> <div>Example Value Schema</div> <pre>{ "id": 0, "email": "string", "authorities": "string"}</pre>	No links
401	<div>Token missing</div> <div>Media type</div> <div>application/json</div> <div>Example Value Schema</div> <pre>{ "id": 0, "email": "string", "authorities": "string"}</pre>	No links
