ForEach Loop Refresher

Syntax: -   foreach(datatype <var_name> : <array_name>){}

ForEachDemo.java

```java
package org.studyeasy;

public class ForEachDemo {
    public static void ForEachExe() {
        String[] names = {"Pooja","Raj","Morris","Deana"};
        for (String name : names) {
            System.out.println(name);
        }
    }
}
```

Main.java

```java
        /*
         * Floating Point Error (Double and Float)
         *
         * float[] values3 = {10.0, 25.1252142, 60}; System.out.println(values3[2]);
         */

        /*
         * float[] values3 = {10.0f, 25.1252142f, 60};
         * System.out.println(" The value of the array element 0 : "+values3[0]);
         * System.out.println(" The value of the array element 1 : "+values3[1]); //Here
         * 2 at decimal point for the given literal gets //truncated
         * System.out.println(" The value of the array element 2 : "+values3[2]);
         */

        ForEachDemo.ForEachExe();
    }
}
```
