Spring Boot – Adding Login Form

Create a -> **AccountController** -> Controller folder

Create a -> **register.html** -> Template -> Register Form

In header.html

```html
<li class="nav-item">
 <a class="nav-link" href="/login">Login</a>
</li>
```

Dependancies -> When you add these dependancies the output looks like below.

```xml
<dependency>
  <groupId>org.springframework.boot</groupId>
  <artifactId>spring-boot-starter-security</artifactId>
</dependency>

<dependency>
   <groupId>org.thymeleaf.extras</groupId>
   <artifactId>thymeleaf-extras-springsecurity5</artifactId>
   <version>3.1.2.RELEASE</version>
</dependency>
```

AccountController -> Add below code

```java
@GetMapping("/login")
    public String login(Model model) {
        return "login";
    }
```

Login.html -> No Object in this

```html
<!DOCTYPE html>
<html>

<head th:replace="/fragments/head :: head">

<body class="sub_page">

  <div class="hero_area">
    <div class="bg-box">
```

```html
      <img src="images/nav-bg.jpg" alt="">
    </div>
    <!-- header section strats -->
    <header th:replace="/fragments/header :: header">
      <!-- end header section -->
  </div>

  <!-- book section -->
  <section class="book_section layout_padding">
    <div class="container">
      <div class="heading_container">
        <h4>
          Login
        </h4>
      </div>
      <div class="row">
        <div class="col-md-6">
          <div class="form_container">
            <form action="#"
              th:action="@{/login}"
              method="post">
              <div>
                <input id="email" type="email"  class="form-control"
placeholder="Email" />
              </div>
              <div>
                <input id="password" type="password" class="form-control"
placeholder="Password" />
              </div>
              <div>
              </div>
              <div class="btn_box">
                <button type="submit">
                  Login
                </button>
              </div>
            </form>
          </div>
        </div>
      </div>
    </div>
  </section>
  <!-- end book section -->
  <!-- footer section -->
  <footer th:replace="/fragments/footer :: footer">
  <!-- footer section -->
</body>

</html>
```

Output after adding dependancies:-
