Java Hibernate - HQL Opeartion - Where

The below line is the criteria for the where HQL operation. Even if it is case sensitive we get same output.

```
//Where
//hibusers is entity name
List<Users> users = session.createQuery("from hibusers where username='ash'").getResultList();
```

or

```
//Where
//hibusers is entity name
List<Users> users = session.createQuery("from hibusers where username='Ash'").getResultList();
```

You get like below log output

```
Apr 21, 2024 4:37:58 PM org.hibernate.Version logVersion
INFO: HHH000412: Hibernate ORM core version 6.4.4.Final
